

COMPANY PROFILE

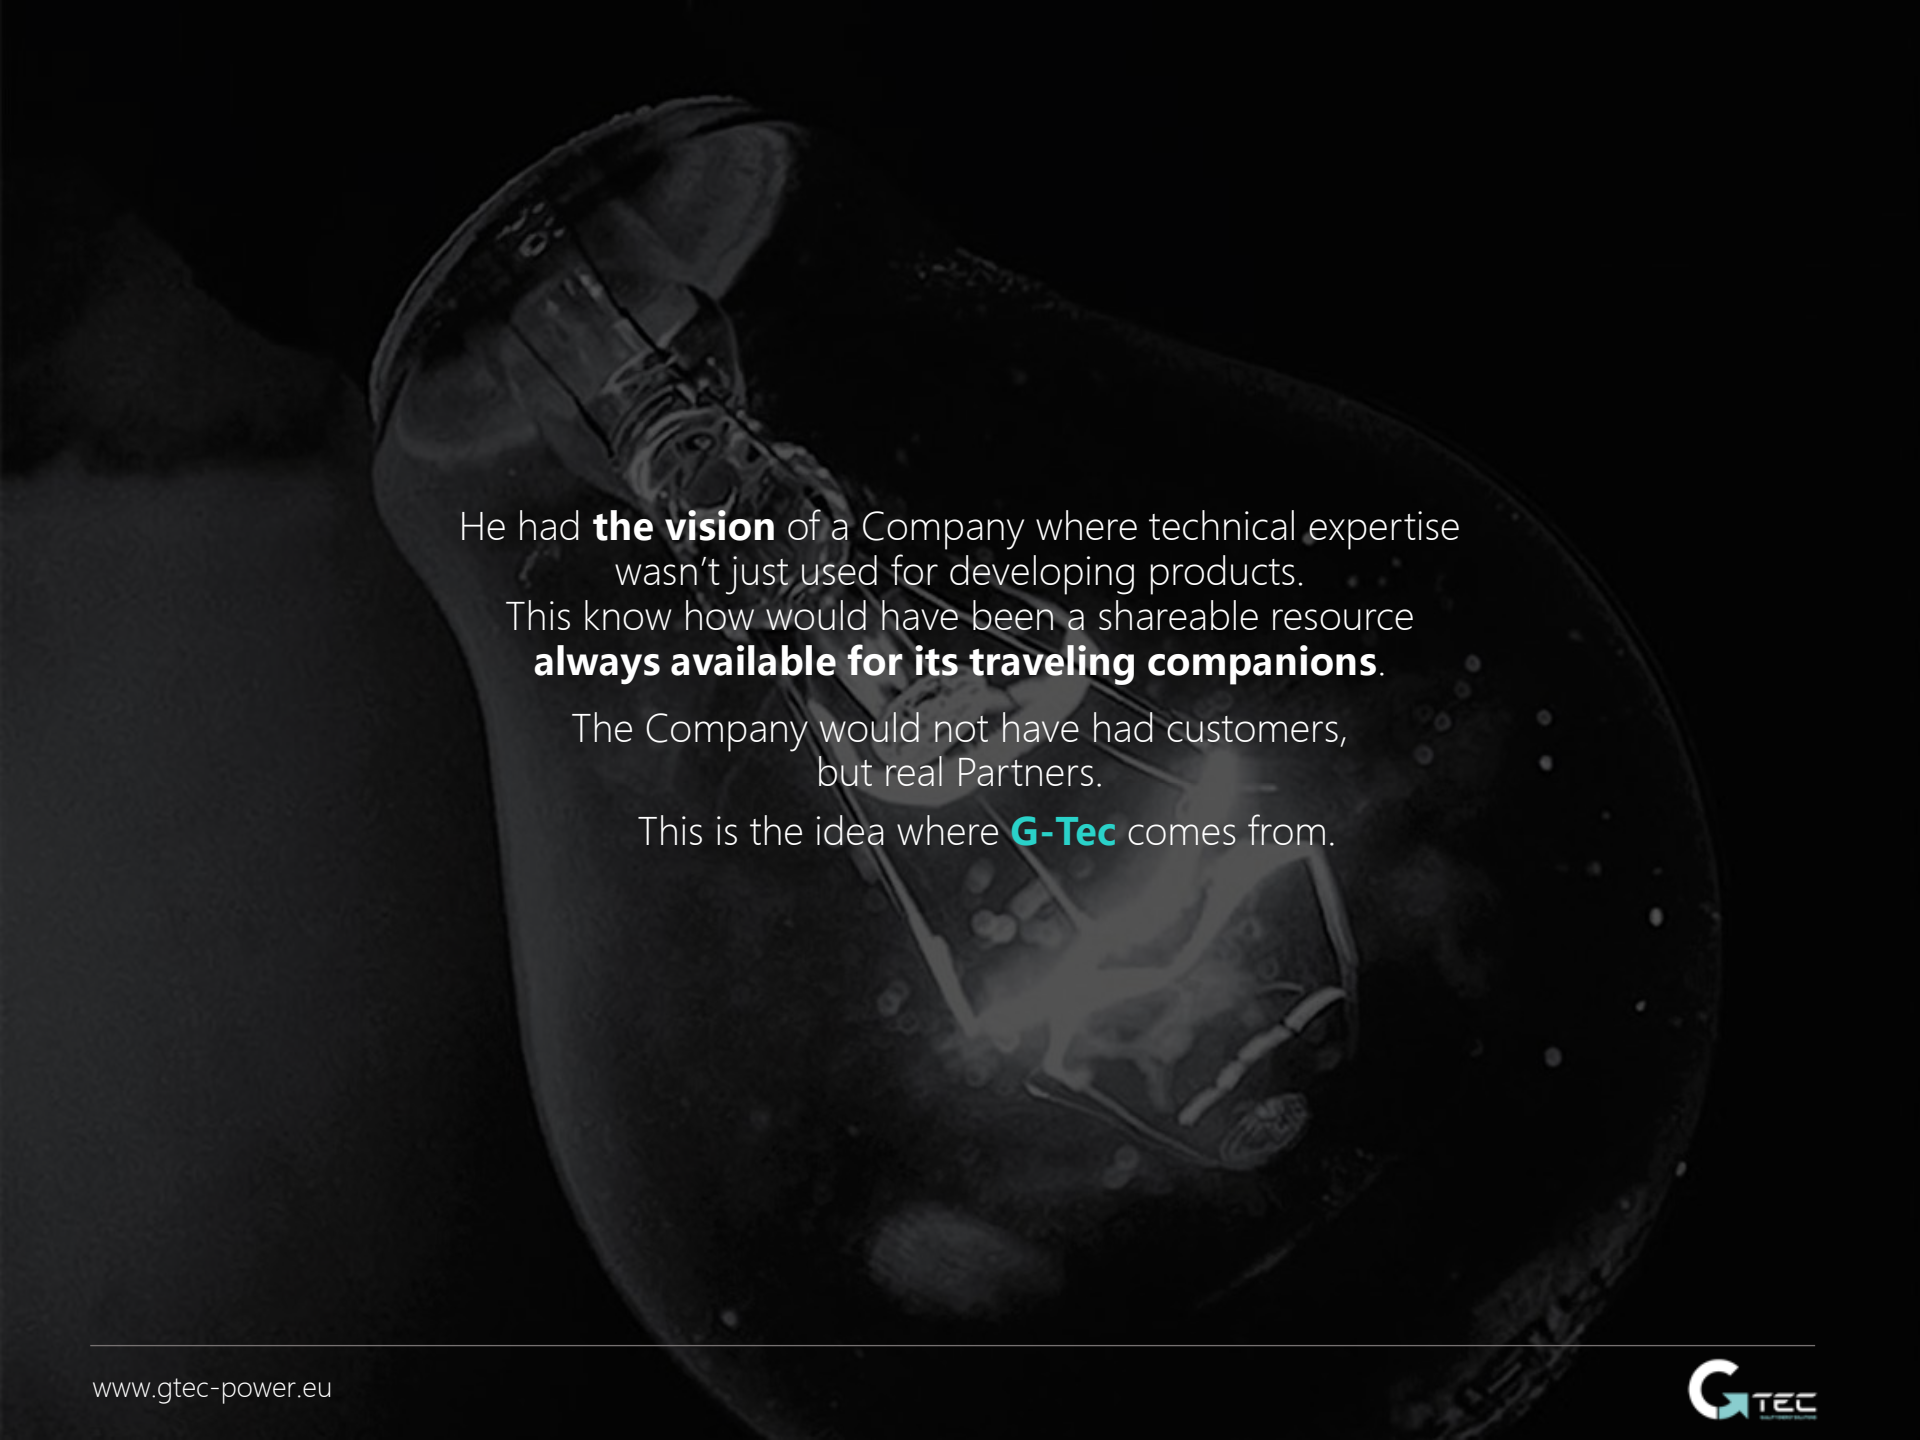

A vibrant cosmic scene featuring several spiral galaxies in shades of blue and purple, set against a dark starry background. In the lower right, the curved horizon of Earth and a smaller planet are visible. A semi-transparent dark box with a teal border is positioned in the center-right, containing the title text.

Origin of species

Our story begins in 2004,
but the original idea was born a very long time back.

Engineer Gabrielle Orio, who already founded Sicon Srl,
is a real icon in the power electronics field,
and has always been driven by seeing saw in his future
the possibility of a **different reality**.

He had **the vision** of a Company where technical expertise
wasn't just used for developing products.
This know how would have been a shareable resource
always available for its traveling companions.

The Company would not have had customers,
but real Partners.

This is the idea where **G-Tec** comes from.

**A special
formula**

Expertise

In more than 30 years of experience we acquired a huge know-how in the UPS field. Despite this, we keep on researching every day for the best and most efficient new technological solutions.

Reliability

G-Tec is a reliable partner who cooperates with dozens of international companies. You can trust us not just because of our product's quality, but because of our unique 360° support service as well.

Flexibility

Every customer is special and unique for G-Tec. Our task is to support him throughout every project step, understanding his needs, and providing him a specific tailor made solution.

Italian style

We are an Italian company, and we are very proud of it. We work hard every day driven by the biggest passion, devotion and attention to detail, because we want to contribute exporting the unique values of Italian Style all over the world.

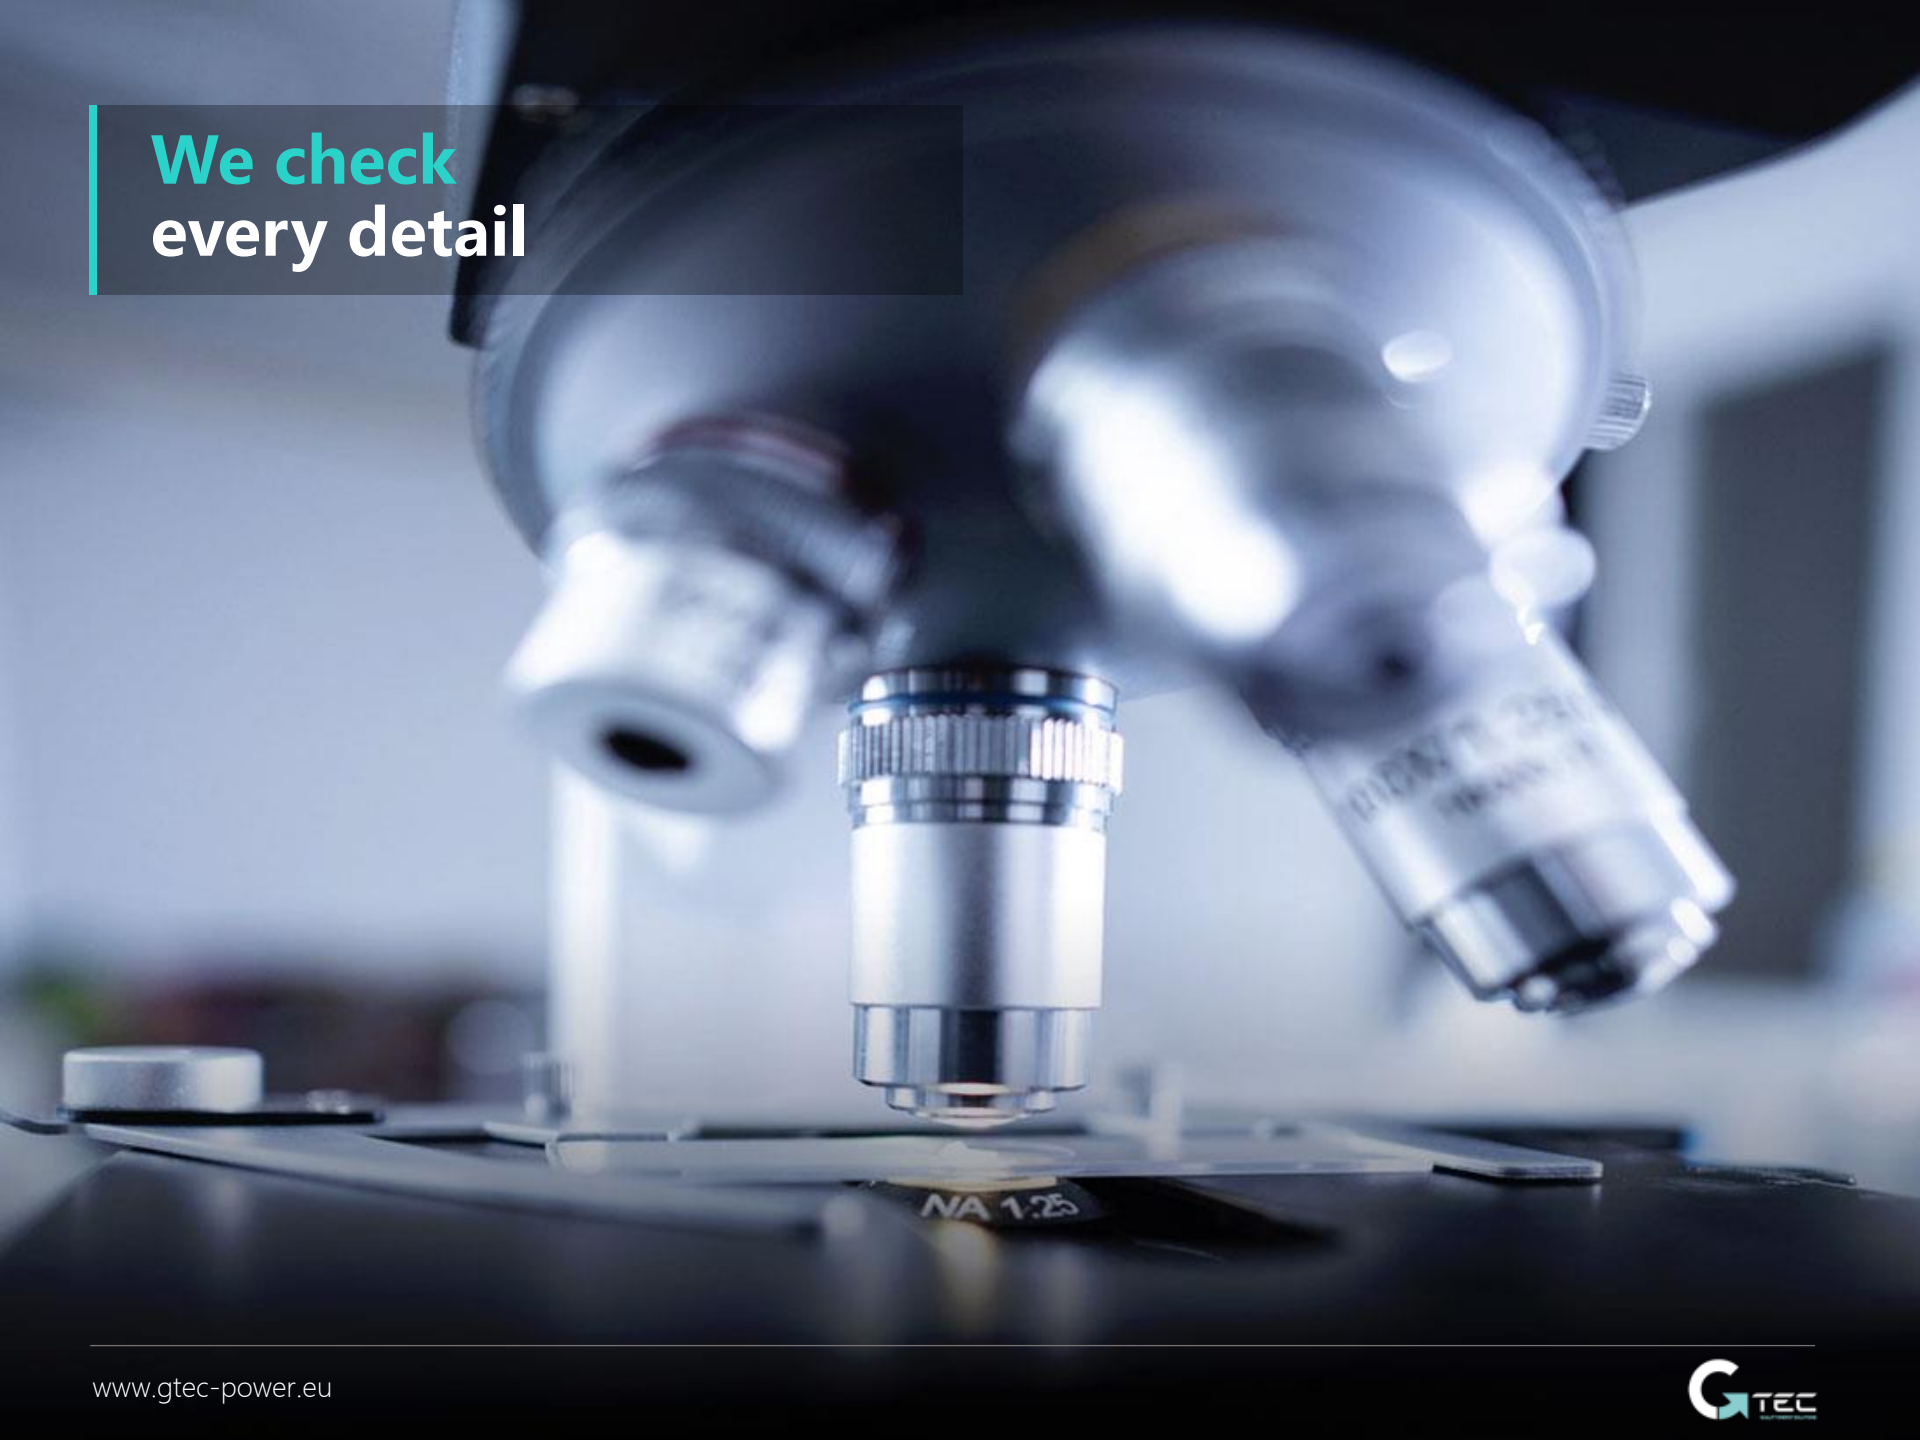

Teamwork

Our team is composed by highly qualified employees and technicians, but human value is the very first asset we look for when we hire a new staff member.

We have a very close-knit team, and teamworking is surely our main strength.

**We check
every detail**

Despite this age is dominated by mass production and standardized products, here in G-Tec **we pursue innovation**, without renouncing to the **artisan tradition's values**.

In **our philosophy** every production process step is planned to the last detail.

G-Tec products are indeed the result of **passion** and **devotion** that guide our workmen's job every single day.

Covers more than 30 Countries

West Europe

France, Spain, Portugal, Germany, Holland, Belgium, U.K., Ireland, Austria, Switzerland.

North and East Europe

Russia, Belarus, Sweden, Denmark, Norway, Finland, Latvia, Lithuania, Estonia, Poland, Czech Rep., Slovakia, Hungary, Romania, Bulgaria, Greece, Macedonia, Bosnia, Kosovo, Serbia, Montenegro, Albania.

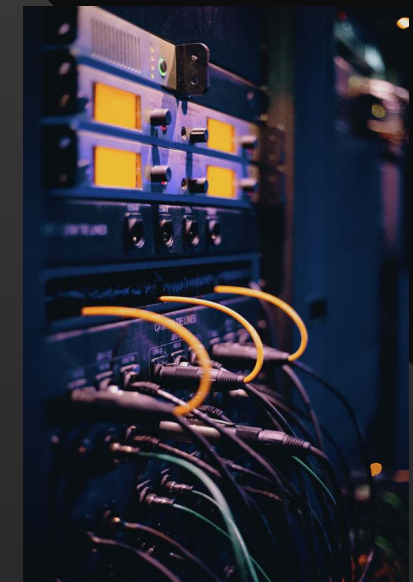

**We solve
problems**

TELECOMMUNICATIONS AND IT NETWORKS

Data Centres, storage servers, IT systems and telecommunication services are today the beating heart of so many Companies, and they often mean huge investments.

Modular and rack UPSs represent the best solution to ensure continuity of service for these specific application areas, where configuration **flexibility, redundancy** possibilities, **easy and quick maintenance** and **compact dimensions** represent real critical factors.

PUBLIC SERVICES

For all those places that manage a **large turnout** of people, such as **colleges, auditoriums, cinemas** or **hospitals**, power supply continuity is the main key to ensure service quality and safety.

In such situations is therefore essential to rely on **highly efficient and noiseless UPSs** that can properly work in stressful conditions, avoiding dangerous downtime thanks to their high **reliability** and specific operating standards compliance.

INDUSTRIAL APPLICATIONS

Industrial environments require **very robust and reliable UPS systems**: enough autonomy must be guaranteed even in the **hardest environment**, usually characterized by dust, humidity, vibrations and high temperatures.

This kind of situations suggest the adoption of **powerful three-phase UPSs**, with **high IP degree** and top level performance, in order to avoid any kind of downtime that can cause long inactivity times and strong economic losses.

TRANSPORT AREA

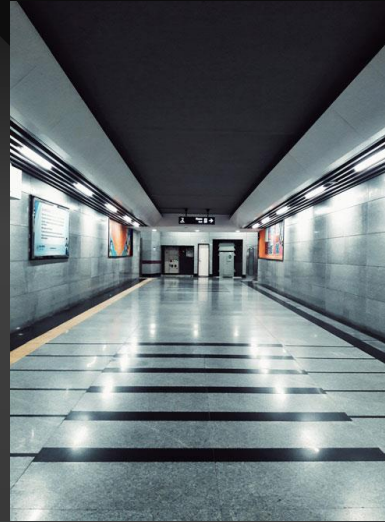

Nowadays the transportation area relies more and more on sophisticated electronic devices. Infrastructures such as **highways**, **airports**, **railways** or **subways** cannot afford long downtime and at the same time their operativity absolutely needs ongoing monitoring services.

Electrical continuity must be guaranteed by **technically advanced UPSs**, with **high protection degree** and the **best remote communication features** available, in compliance with the standards of the specific sector.

EMERGENCY APPLICATIONS

Emergency applications such as **fire systems**, **carbon monoxide detectors** or other **alarm systems** require extremely reliable UPSs, compliant to the **EN50171 standard** requirements.

These special uninterruptible power supplies meet the standard required by providing **maximum autonomy** level, **minimum charging times**, and an **advanced overload management** system.

SMALL OFFICE & HOME OFFICE

Small companies, free-lance professionals and **home users** experience increasingly need for quality power supply, in order to protect their sensitive and valuable electronic devices from power surges and blackouts.

G-Tec meets these users' needs with **compact, silent**, and **efficient UPSs**, that can be monitored by intuitive management software.

Many **notable international companies** decided to trust us, choosing our solutions. We are very proud of their choice, because they are testimonial of our **reliability, competence** and **work ethic**.

The journey
goes on

In order to ensure the best cooperation experience, G-Tec supports its partners throughout the whole product life cycle, providing technical assistance and after-sales service at the highest professional standards.

Design

We support our customers during the UPS choice phase and we provide them with tailor-made systems, sized and designed on their specific needs.

Installation

We provide on site services for UPS installation and start-up, ensuring a correct and safe system activation.

Technical support

We guarantee an excellent and fast customer care service, available 7 days a week, carried out by highly specialized operators.

Maintenance

We arrange maintenance and repair operations upon request, always ensuring technicians availability, minimum intervention times, and our signature quality standards.

Service training

We constantly schedule training courses for our partners' technical staff, so that they are always able to safely perform routine maintenance tasks.

Products updating

Periodic training courses are also provided for commercial staff, in order to show new features and main strengths of our product range.

A night landscape featuring a starry sky with the Milky Way, a calm lake reflecting the light, and dark mountains in the background. The scene is illuminated by a soft orange glow on the horizon, likely from a setting or rising sun.

Coming together is a beginning,
keeping together is progress,
working together is success.

Henry Ford
